## Domestic Operations

- Domestic Operations revenues for the third quarter increased 25% to \$683 million compared to the prior year quarter
  - Distribution and Other revenues increased 26% to \$483 million
    - Content licensing revenues increased 60%, driven by a higher number of distributed original programs as compared to the prior comparable period as a result of earlier COVID-19 pandemic production delays
    - Subscription revenues increased 14% due to increased streaming revenues driven by increased subscribers to our streaming services, partially offset by a low-single digit decrease in linear affiliate revenues, attributable to declines in the linear subscriber universe
  - Advertising revenues increased 22% to \$200 million due to higher pricing and ad-supported streaming growth, and an increase in the number of episodes of our original programming, partially offset by lower linear ratings
- Operating Income increased 19% to \$213 million in the quarter
- Adjusted Operating Income increased 12% to \$231 million, reflecting increased advertising and distribution revenues, partially offset by increased programming and subscriber acquisition and retention marketing investments to support the continued growth of streaming revenue

### **International and Other**

- International and Other revenues for the third quarter of 2021 increased 17% to \$130 million compared to the prior year quarter
  - Distribution and Other revenues increased 13% to \$105 million primarily due to increased production revenues at 25/7 Media and increased distribution revenues at AMCNI, as well as the favorable impact of foreign currency translation
  - Advertising revenues increased 34% to \$25 million largely related to higher pricing, better ratings and the favorable impact of foreign currency translation at AMCNI
- Operating Income increased 409% to \$16 million in the quarter
- Adjusted Operating Income increased 148% to \$22 million in the quarter
  - Operating Income and Adjusted Operating Income reflected the increase in Advertising and Distribution and Other revenues, partially offset by an increase in selling, general and administrative expense

### **Other Matters**

#### **Stock Repurchase Program & Outstanding Shares**

As previously disclosed, the Company's Board of Directors has authorized a program to repurchase up to \$1.5 billion of the Company's outstanding shares of common stock. The Stock Repurchase Program has no pre-established closing date and may be suspended or discontinued at any time. During the third quarter of 2021, the Company did not repurchase any shares. As of September 30, 2021, the Company had \$135 million of authorization remaining for repurchase under the Stock Repurchase Program.

As of October 29, 2021 the Company had 30,767,784 shares of Class A Common Stock and 11,484,408 shares of Class B Common Stock outstanding.

Please see the Company's Form 10-Q for the period ended September 30, 2021 for further details regarding the above matters.

## **Description of Non-GAAP Measures**

The Company defines Adjusted Operating Income (Loss), which is a non-GAAP financial measure, as operating income (loss) before depreciation and amortization, cloud computing amortization, share-based compensation expense or benefit, impairment and other charges (including gains or losses on sales or dispositions of businesses), restructuring and other related charges, and including the Company's proportionate share of adjusted operating income (loss) from majority owned equity method investees. From time to time, we may exclude the impact of certain events, gains, losses or other charges (such as significant legal settlements) from AOI that affect our operating performance. Because it is based upon operating income (loss), Adjusted Operating Income (Loss) also excludes interest expense (including cash interest expense) and other non-operating income and expense items. The Company believes that the exclusion of share-based compensation expense or benefit allows investors to better track the performance of the various operating units of the business without regard to the effect of the settlement of an obligation that is not expected to be made in cash.

The Company believes that Adjusted Operating Income (Loss) is an appropriate measure for evaluating the operating performance of the business segments and the Company on a consolidated basis. Adjusted Operating Income (Loss) and similar measures with similar titles are common performance measures used by investors, analysts and peers to compare performance in the industry.

Internally, the Company uses net revenues and Adjusted Operating Income (Loss) measures as the most important indicators of its business performance, and evaluates management's effectiveness with specific reference to these indicators. Adjusted Operating Income (Loss) should be viewed as a supplement to and not a substitute for operating income (loss), net income (loss), and other measures of performance presented in accordance with U.S. generally accepted accounting principles ("GAAP"). Since Adjusted Operating Income (Loss) is not a measure of performance calculated in accordance with GAAP, this measure may not be comparable to similar measures with similar titles used by other companies. For a reconciliation of operating income (loss) to Adjusted Operating Income (Loss), please see pages 7-8 of this release.

The Company defines Free Cash Flow, which is a non-GAAP financial measure, as net cash provided by operating activities less capital expenditures and cash distributions to noncontrolling interests, all of which are reported in our Consolidated Statement of Cash Flows. The Company believes the most comparable GAAP financial measure of its liquidity is net cash provided by operating activities. The Company believes that Free Cash Flow is useful as an indicator of its overall liquidity, as the amount of Free Cash Flow generated in any period is representative of cash that is available for debt repayment, investment, and other discretionary and non-discretionary cash uses. The Company also believes that Free Cash Flow is one of several benchmarks used by analysts and investors who follow the industry for comparison of its liquidity with other companies in the industry, although the Company's measure of Free Cash Flow may not be directly comparable to similar measures reported by other companies. For a reconciliation of net cash provided by operating activities to Free Cash Flow, please see page 9 of this release.

The Company defines Adjusted Earnings per Diluted Share ("Adjusted EPS"), which is a non-GAAP financial measure, as earnings per diluted share excluding the following items: amortization of acquisition-related intangible assets; impairment and other charges (including gains or losses on sales or dispositions of businesses); non-cash impairments of goodwill, intangible and fixed assets; restructuring and other related charges; and gains and losses related to the extinguishment of debt; as well as the impact of taxes on the aforementioned items. The Company believes the most comparable GAAP financial measure is earnings per diluted share. The Company believes that Adjusted EPS is one of several benchmarks used by analysts and investors who follow the industry for comparison of its performance with other companies in the industry, although the Company's measure of Adjusted EPS may not be directly comparable to similar measures reported by other companies. For a reconciliation of earnings per diluted share to Adjusted EPS, please see pages 10-11 of this release.
